### DDoS Mitigation Advisory

#### DDoS Mitigation Advisory

The Distributed Denial of Service (DDoS) Mitigation Advisory provides guidance to organisations on how to prepare for, identify, contain and mitigate DDoS attacks whilst minimising impact to business operations.

The Advisory is structured around the Govern, Identify, Protect, Detect, Respond and Recover (GIDPRDR) functions from the National Institute of Standards and Technology's Cybersecurity Framework (CSF) 2.0.

#### Best Practices

- Govern**
  - Establish organisational policies that outline the security goals
  - Establish a DDoS Incident Response Plan to facilitate smoother execution of DDoS response
- Identify**
  - Identify critical assets and services of the organisation that are exposed to public internet
- Protect**
  - Design for resiliency and conduct DDoS sustainability tests
  - Maintain good cyber hygiene and be familiar with the Response Plan
  - Engage DDoS Protection Service Providers
- Detect**
  - Monitor for early warnings for DDoS attacks for prompt response and minimal disruption
  - Determine the nature and scope of the DDoS attack and communicate details to the right teams
- Respond**
  - Execute DDoS incident Response Plan and other mitigation measures to minimise the impact of the DDoS attack and reduce service disruption
- Recover**
  - Perform restoration activities to resume normal operations
  - Review and incorporate lessons learned into DDoS Response Plan

# New versions launched!

The question is not if, but when a cyber incident will occur?

EC-Council's Certified Incident Handler (ECIH) program equips students with the knowledge, skills, and abilities to effectively prepare for, deal with, and eradicate threats and threat actors in an incident.

The newly launched Version 3 of this program provides the entire **process of Incident Handling and Response** and hands-on labs that teach the **tactical procedures and techniques** required to effectively **Plan, Record, Triage, Notify** and **Contain**.

ECIH also covers **post incident activities** such as **Containment, Eradication, Evidence Gathering** and **Forensic Analysis**, leading to prosecution or countermeasures to ensure the incident is not repeated.

With over **95 labs, 800 tools** covered, and exposure to Incident Handling activities on four different operating systems, ECIH provides a well-rounded, but tactical approach to planning for and dealing with cyber incidents.
