Join as Career Mentors for NTUC Mentors Community!

We firmly believe that nurturing talent and fostering professional growth for the youth and PMEs are pivotal to our organization's success in membership and mindshare. Mentorship is a cornerstone in achieving these goals, and your department plays a crucial role in the success of MCE.

For Your Mentors: We invite your mentors to come on board and to share their wealth of knowledge and expertise.

By participating as mentors in our ecosystem, they will have the opportunity to:

1. **Make an Impact:** Mentorship is a meaningful way to give back to the society and guide the next generation of talent.
2. **Personal Growth:** Being a mentor provides personal and professional growth opportunities by attending training tailored for them.
3. **Networking:** Mentors can expand their professional network by connecting with other mentors from diverse backgrounds and experiences.

For mentors who are interested in participating, please register below. We will work closely with you to ensure a smooth onboarding process.

We truly believe that together, we can create a dynamic and supportive environment that empowers our workers to better life, better welfare, and better job prospect.

Personality and its Impact on Security Behaviors Survey

The purpose of the survey is to examine how demographics and personality traits influence the security intention of security intention of device securement, password generation, proactive awareness, updating and expanded our study to include multi-factor authentication.

We believe that the results from this survey and study have practical implications as they can help identify groups of users with stronger or weaker security behaviours which are useful in talent identification, education outreach planning as well as helping to guide future research.

Please complete this survey by 31st Jan 2024.

AiSP CyberSec Conference 2024 15 May 2024

Organised by the Association of Information Security Professionals (AiSP), the AiSP SME Conference is a unique event that brings together organisations to discuss the importance of being cyber aware and stay protected. The event will provide our speakers with the opportunity to share their experience, skills and knowledge to show how cybersecurity can help companies to stay protected. AiSP aims to elevate cybersecurity awareness among companies and establish a self-sustaining ecosystem with active participation from government agencies, business associations, cybersecurity communities, and solutions provider.

Our theme for this year conference is “Sustaining growth and innovation securely in this challenging business environment”.

As part of AiSP Cybersecurity Awareness and Advisory Programme (CAAP), this event is for Singapore Enterprise and SMEs to know more about cybersecurity as a business requirement and how they can implement solutions and measures for cyber-resilience. CAAP hopes to elevate cybersecurity awareness as integral part of business owner's fundamentals and establish a self-sustainable support ecosystem programme with active participation from agencies, business associations, security communities and solutions provider.

Date : 15 May 2024

Time : 9AM – 3PM

Venue : Suntec Convention Centre

Guest of Honour:

Morning: AiSP Patron – Senior Minister of State, Ministry of Communications and Information & Ministry of National Development
- Mr Tan Kiat How

Afternoon: Member of Parliament for Pasir Ris-Punggol GRC & NTUC U SME Director - Ms Yeo Wan Ling

Safe App Standard 7 February 2024

SAFE APP STANDARD

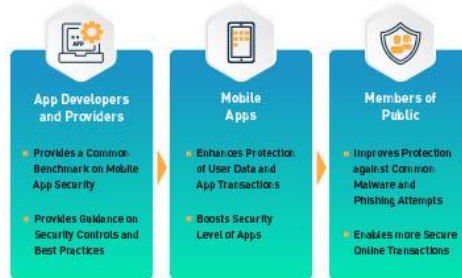

The **Safe App Standard** provides a common benchmark and guidance to local app developers and providers on the security controls and best practices to better protect their apps, and in turn, their end-users, against common malware and phishing attempts.

The Standard is targeted at apps that perform high-risk transactions, defined as those that allow transactions with some or full access to users' financial accounts, which when compromised, can possibly result in significant monetary losses.

These transactions include changes to financial functions such as registration of third-party payee details and increase of fund transfer limit.

How can the Safe App Standard contribute to a more secure digital landscape?

The Standard focuses on **four critical areas** commonly targeted by threat actors.

By including these features, developers make it more difficult for attackers to steal sensitive business data and cause financial losses to users when they utilise the apps for high-risk transactions.

For more information, visit www.csa.gov.sg

Professional Course Development

The question is not if, but when a cyber incident will occur?

EC-Council's Certified Incident Handler (ECIH) program equips students with the knowledge, skills, and abilities to effectively prepare for, deal with, and eradicate threats and threat actors in an incident.

The newly launched Version 3 of this program provides the entire **process of Incident Handling and Response** and hands-on labs that teach the **tactical procedures and techniques** required to effectively **Plan, Record, Triage, Notify** and **Contain**.

ECIH also covers **post incident activities** such as **Containment, Eradication, Evidence Gathering** and **Forensic Analysis**, leading to prosecution or countermeasures to ensure the incident is not repeated.

With over **95 labs, 800 tools** covered, and exposure to Incident Handling activities on four different operating systems, ECIH provides a well-rounded, but tactical approach to planning for and dealing with cyber incidents.
